

Digi XBee Global Connect

Global IoT Connectivity — one SIM, 185 countries, multiple carriers per zone. Global Connect gives any cellular device global coverage and a single portal to manage it. No carrier negotiations, bundles or contract. Only pay for what you use.

Digi XBee Global Connect delivers global IoT connectivity in one SIM with a single management portal.

One SIM — everywhere

Automatically connects to the strongest available carrier at every location. Multiple carriers per zone for redundancy. No swapping. No region-locked plans. No manual configuration.

Activate without calling anyone

Claim your SIM at scan-iotsuite.digi.com. Scan or enter the ID on the card. No support ticket. No waiting. Full API for automated fleet provisioning at scale.

Deploy — it just connects

Insert the SIM and power on. Your device picks the strongest available carrier automatically. No APN lookup. No configuration. No site survey required.

One portal for everything

SIM status, usage alerts, diagnostics, and billing in Digi IoT Suite. Set data limits per SIM. Get notified before you hit them. Included at no extra cost with every plan.

Works with any device — one team behind it all

Use Global Connect with Digi hardware or your own. Digi provides seamless connectivity and support. No finger-pointing between vendors.

Scale without friction

Add SIMs, expand to new regions, and manage your entire fleet from one portal as you grow. Inactive SIMs are never charged.

Try for free — upgrade when ready

Start with a 100 MB Test Drive — no credit card, no contract. Find your data baseline, then move to a paid plan when you're ready.

Try before you commit

Try it with 100 MB free for 3 months
Validate coverage at your actual installation locations before you commit.
No credit card. No contract.

Key features, benefits and applications

- **Starting at \$0.010/MB** — no contract, cancel anytime
- **Digi IoT Suite included at no extra cost**
- **SIM lifecycle and fleet:** activate, assign plans, monitor usage, manage every SIM from one portal
- **Usage alerts:** set data limits per SIM, get notified before you hit them and export reports for ops teams
- **Connectivity diagnostics:** see which network each SIM is on, last-seen timestamp, session state and troubleshoot remotely
- **Full API access:** provision SIMs, pull usage data, integrate into your own tools and automate anything
- **Monthly access fee:** charged only on active SIMs
- **Data billed per MB:** billed by zone based on where your SIM is active with rates visible in IoT Suite — no surprises
- **One monthly invoice:** all zones, all SIMs, one bill, with per-SIM and per-zone detail available anytime in IoT Suite

Quick activation. One SIM. Global reach.

Digi XBee Global Connect is powered by G+D technology, managed through Digi IoT Suite. [Visit **digi.com/globalconnect**](https://digi.com/globalconnect).
